Detail-oriented and results-driven Manual/Automation Tester with 2.9 years of experience software quality assurance Cognizant Technology Solutions Proficient in designing , developing , and executing manual test cases as well as creating and maintaining automated test scripts .Skilled in identifying defects, troubleshooting issues ,and ensuring the overall quality of software products across various platforms. Adapt at collaborating with cross-functional teams to understand requirements and deliver high-quality solutions within tight deadlines .Proven ability to adapt quickly to new technologies and methodologies while continuously improving testing processes to enhance efficiency and effectiveness.

EXPERIENCE:

Quality Assurance Engineer

Cognizant Technology Solutions- 07/2022-Present

- Created detailed test cases and test plans based on project requirements.
- Manual Testing of different mobile apps such as Android/iOS devices to ensure the performance and stability of the product.
- Performed system-wide testing to ensure software quality and accuracy.
- Maintained clear communication between QA , development , and project management teams to promote teamwork and high-quality results.
- Documented test results ,reported defects ,and tracked issues using tools like Jira and Confluence to ensure timely resolution.
- Improved product reliability thorough functional and regression testing in each release cycle.
- Worked closely with developers to enhance software performance and stability.
- Took part in agile practices like sprint planning, daily stand-ups, and retrospective meetings, providing valuable QA input throughout the project.
- Presented new product features and functionalities to stakeholders.
- Reviewed testcases and provided feedback to improve test accuracy and coverage.
- Met tight deadlines to fulfill client needs and project timelines.
- Implemented automated testing using tools like Selenium Web Driver to improve testing speed and coverage.
- Optimized test cases to increase the effectiveness soft manual testing.
- Presented new product features and functionalities to stakeholders.
- Developed and maintained automated test scripts using Selenium WebDriver, TestNG, and JUnit to streamline testing processes.
- Implemented automation frameworks such as Page Object Model(POM) and Data-Driven using TestNg.
- Integrated automated tests into CI/CD pipelines using tools like Jenkins
- Conducted API testing using Postman
- Manual Testing of different mobile apps such as Android/iOS devices to ensure the performance and stability of the product.

PROJECTOVERVIEW:

Domain : Banking And Finance Services

- Exception & Claims Workflow Dashboards for managing loan exceptions and claims processing.
- Search & Pipeline Management to retrieve and track loans with statuses like Hold/Working.
- GetNext Task Automation for dynamically assigning the next available loan.
- Loan Details & Claim Verification covering borrower info, partial claims, and loan status.
- Claim Intake & Submission with document upload, validation, and claim filing options.
- Final Claim Package Generation for assembling and retrieving claim documents.
- 100% Automation of Exception Dashboard reducing manual efforts in loan processing.

SKILLS&TOOLS

- Manual Testing
- Automation Testing
- Selenium
- API Testing with Postman
- TestNG
- Java
- Eclipse
- Agile Methodology
- Functional Testing
- Git
- Selenium
- JIRA
- Mobile App Testing(Android/IOS)
- Team management

AWARDS& RECOGNITION:

- Award for raising more number of defects from the project during a critical release.
- Award for the outstanding team performance on multiple critical releases.

EDUCATION:

- B.Tech
ABES ENGINEERING COLLEGE,GHAZIZBAD(2018-2022)
-
